

Calendar 2024

Campus, Community & Commitment To Sustainability

IIM Bangalore, an institute renowned for offering world-class management education, believes that delivering public good is the best possible way to deliver lasting values. By infusing social engagement and a sense of responsibility towards sustainability among its students, the institute aims to build public-minded leaders.

We have a strong focus on environmental awareness, positive impact and sustainable living. Our buildings integrate nature with education and our campus is an oasis of natural diversity in the city of Bangalore. Our sustainability measures help our students understand how their decisions and actions affect the environment, and enable them to make informed decisions as managers of the future.

Sustainability Task Force

We have set up a Sustainability Task Force which is engaged in sensitizing people and infusing a sense of urgency about conservation.

As part of our philosophy of 'waste not, want not', while food (wet) waste is converted into biogas and compost, sorted dry waste is sent to authorized recyclers and we are on the path to become a 'zero-waste' campus. Committed to the 'zero-waste' campaign, 90 per cent of waste generated on campus is recycled and reused.

The students too, have a vibrant Environment Sustainability Club. We have incorporated sustainability in all our courses.

January 2024

Flourishing in their new environment! Due to the ongoing construction of Bannerghatta Road Metro, several trees were removed from Bannerghatta Road, which were thereafter strategically translocated to suitable locations inside the IIMB campus. Being nurtured well, these trees are thriving in their fresh surroundings, enhancing the natural beauty of our campus.

- 25 Christmas

Eco-friendly warmth since 2015! Our heat pumps, installed with 50% power consumption savings, maintain a constant temperature using electricity. Operating in reverse cycle like AC, they keep water hot round the clock.

● General Holidays ● Restricted Holidays

'Zero Waste' pledge

Our students have taken the 'Zero Waste' pledge. The student mess and the department canteen have eye-catching slogans, in many languages, that encourage patrons to take only as much as they can eat, and a large display board indicating the amount of daily food waste and how many mouths it could have fed, in a bid to inculcate sensible consumption. We continue to keep the pledge.

Biodiversity

Our green campus has been winning accolades, year on year, from the Mysore Horticultural Society. It is a safe haven for birds including spotted owls, white-cheeked barbets, flycatchers, barn owls, purple sunbirds, and more.

A unique system of planting, called the Miyawaki method, has been taken up wherein mixed species of forest saplings are planted at 2'*2' spacing. Honeybees are being reared on a part of the campus. Fish have been introduced in lotus ponds to control algae and mosquito larvae.

Recognition

Our campus is included in 'The 25 Most Significant Works of Post-War Architecture', according to The New York Times Style Magazine.

We have also received an Appreciation Certificate from the Government of Karnataka, acknowledging the adoption of environment-friendly initiatives and sustainable practices on campus.
