

The Third Annual Future of Learning 2020 Conference Learning to Learn, Unlearn and Relearn: Flourishing in the Age of Disruptions and Innovation

The Future of Learning Conference (FOL2020) is the third annual conference that aims to bring together academic leaders, policymakers, industry professionals, and technologists to provoke thought, showcase innovation and share knowledge along three paradigms of the future of learning: **Learning to Learn, Unlearn and Relearn.**

The massive technology-led disruptions in the educational sector are compelling both individuals and institutions to respond adaptively. Traditional approaches to education, itself a legacy of the industrial revolution, is no longer relevant in a global, massively networked, hypercompetitive world. For instance, there is much uncertainty and ambiguity around the future of work with the emergence of technologies like Augmented Reality, Artificial Intelligence, and Internet of Things and Big data management tools. These, in turn, have facilitated the emergence of new pedagogies in learning using adaptive learning, personalised learning and a host of new pedagogical approaches. Simultaneously, the skillsets for effectively meeting the workplace challenges of the future have also evolved with the advances in AI, ML and automation change job requirements. In short, education and institutions that deliver the skillsets need a re-architecting. As many have pointed out, Learnability is the new skill that will now drive excellence in both individuals and institutions.

The FOL 2020 conference will address the following questions:

- What is learnability in the context of Industry 4.0?
- How and what competencies do we build in our learners, and how should pedagogical and institutional arrangements evolve correspondingly?
- How do we create learning spaces that accommodate and support new types of learning experiences and yet unknown technology advancements without compromising individuality, creativity and innovation?
- Which ecosystem elements need to evolve? What policy interventions are needed?
- What is the link between learnability and employability?

Details of the first two conferences on Future of Learning can be accessed at <http://www.futureoflearning conference.com/>

Papers on the above and related themes are invited from researchers, practitioners and policymakers. Please submit your abstracts not exceeding 300 words to: <https://easychair.org/conferences/?conf=fol2020>

Conference Date: January 3-4 2020

Venue: IIM Bangalore, India

Important Dates:

Last date of submission of abstracts:
October 31st, 2019

Final paper submissions:
December 10th, 2019

Communication of acceptance of papers:
November 10th, 2019
