What do you think of your IIMV learning experience?

It was an enriching and exciting experience for me, completely transforming the way I plan and work. The rigorous IIM schedule has also taught me to multitask and deal with competing priorities effectively. As a member of the first SAC (where I played an important role in **scripting and instituting the PGP student charter**) and as a representative of the Academic Council, I have learnt to work for and with people and become a real professional. Overall, my IIMV learning experience has been immensely fulfilling and satisfactory.

Future plans & dreams

Having always been fascinated by gadgets and gizmos and having pursued my bachelor's degree in Computer Science & Engineering, I am naturally drawn towards the technology space. I aspire to take on a Product Management role in the near future and eventually be part of the top management of a leading global tech giant.

Brief family background

I hail from Madurai (in Tamil Nadu), popularly known as the temple city and home to the world famous Meenakshi Amman Temple. My father is a practising Chartered Accountant and my mother is a homemaker. My elder sister, an instrumentation engineer, is married and settled in Chennai and is on full-time duty taking care of her 4-year-old daughter.
